

**JJ Tech's SELECT-JET Bottom Hole Assemblies allow for maximum flexibility inside the tubing string. Common Profiles are incorporated into the BHA so additional connections are minimized.**

**Large flow thru ports allow for reduced velocity between tubing and casing.**

**CASING ISOLATION SLEEVE is available and adds greater reliability than self contained Sliding Sleeves.**

**BHA is constructed of 17-4 PH Stainless Steel, and Inconel 625 is available. (Special Order)**

### *Features / Advantages / Benefits*

---

- High Volume Flow Ports (6.47" or 3.68")
- Available Casing Isolation Sleeve
- X-Profile-Top (2.31" or 1.87")
- Bottom No-Go (2.250" or 1.796")  
2" SJBHA has 1.87 XN Profile
- Blast Joint wall thickness
- Standard Material 17/4 PH
- Inconel 625 Available
- QPQ Coating for Anti-Galling of threads
