

JJ Tech's 2" SELECT-JET 2X Pump is the high volume version for 2-3/8" tubing applications. The 2X pump can accept a wider range of Nozzles and Mixing tubes than the standard 2" SELECT-JET pump. These versatile pumps can be adapted to fit inside most any Jet Pump BHA on the market.

Features / Advantages / Benefits

- Versatile Bottom Hole Assembly with High Flow Capacity
- 2" SELECT-JET 2X can accept up to I:12 Pump Assembly
- Available Isolation Sleeve ensures reliability over Sliding Sleeve
- Ability to attach down-hole gauges to Standing Valve
- Ability to run and retrieve down-hole gauges without Wireline
(Gauge is run inside the pump)
- All Viton elastomers (O-Rings)
- PEEK / Teflon Vee Packing
- Standing Valve has 1.25" NPT Lower Thread for Strainer Nipple / Attachment or down-hole gauge.
- Standard Materials are 17-4 PH Stainless Steel (QPQ)
- Premium Materials Include:
Inconel 625 - Hastelloy X - 316 Stainless Steel
420 Stainless Steel (Boron Carbide Clad)
